

# **ANNUAL CCR FUGITIVE DUST CONTROL REPORT**

KINGFISHER DEVELOPMENT, LLC - STUART  
(FORMER STUART STATION SITE)  
745 US HWY 52  
MANCHESTER, OHIO 45144

December 2020

This Annual CCR Fugitive Dust Control Report has been prepared for Kingfisher Development (the former Stuart Station site), as required by 40 CFR 257.80(c). Section 1 provides a description of available actions that can be taken, if necessary, to control CCR fugitive dust at the facility during the reporting year. Section 2 provides a record of citizen complaints received concerning CCR fugitive dust at the facility during the reporting year and a summary of any corrective measures taken.

**SECTION 1 ACTIONS TAKEN TO CONTROL CCR FUGITIVE DUST**

In accordance with Kingfisher Development’s CCR Fugitive Dust Control Plan (Plan), the following measures would be implemented to control CCR fugitive dust from becoming airborne at the facility during the reporting year, if necessary:

| CCR Activity                                  | Actions Taken to Control CCR Fugitive Dust   |
|---|--|
| Management of CCR in the facility’s CCR units | Wet management of CCR materials in CCR surface impoundments.   |
|   | Water areas of exposed CCR in CCR units.   |
|   | Naturally occurring grass vegetation in areas of exposed CCR in CCR surface impoundments.              |
| Handling of CCR at the facility               | CCR handled during closure activities of CCR surface impoundments remains conditioned during handling. |
|   | Good housekeeping measures, such as sweeping or wetting, as needed.                                    |

The ponds at Stuart are being dewatered in preparation for formal closure. Based on a review of the Plan and inspections associated with CCR fugitive dust control performed in the reporting year, necessary control measures identified in the Plan as implemented at the facility effectively minimized CCR from becoming airborne. No revisions or additions to control measures were needed to control CCR fugitive dust.

The Stuart Site, now owned by Kingfisher Development, was permanently retired on May 31, 2018. Once all closure activities are completed, the Plan will be amended to remove CCR fugitive dust control measures associated with CCR activities/ systems that are no longer occurring/ in operation.

**SECTION 2 RECORD OF CITIZEN COMPLAINTS**

No citizen complaints were received regarding CCR fugitive dust at the Kingfisher Development – Stuart site in the reporting year.
